PROJECTS

- **SportingLife**   Live Site   Github Client   Github Server
  - **SportingLIfe** is a sports website, it allows users to log in or signup, The users can see the instructors and classes, and also they can add a class to their selected list, and after making a payment by stripe they can enroll in the class
  - After successfully purchasing a class, the user can see it in the enrolled classes section, also by default everyone will be a regular user by default. An admin can make a user an admin or instructor from the admin dashboard and also an admin can approve or decline the classes added by an instructor from the admin dashboard.
  - An instructor can add a new class, and view all of the classes added by himself.

  Technologies: React, Express.js, MongoDB, JWT, Stripe, Firebase, Vercel. these are the key technologies in this website

- **MotorToys**   Live Site   Github Client   Github Server
  - **MotorToys** is a toy store website, in the home page, you will be able to see the toys by category, by changing tabs
  - A user can log in or sign up to the website by using sign up form or Google, and after logging in the user will be able to see my toys and add a toy page, and if the user is not logged in, then these two pages will not be available
  - From the "add a toy" page, a logged-in user can add a new toy with relevant information, and from the "my toys" page the user will be able to see all of the toys added by himself and he can edit or delete the toys as well.

  Technologies: React, Express.js, MongoDB, JWT, Firebase, Vercel. these are the main technologies in this website

- **BanglaFoods**   Live Site   Github Client   Github Server
  - We have sign up and login system here, and also a user can login using google or github.
  - We have some top-quality chefs from Bangladesh, and each chef has some recipes, we can see all of the recipes by the chef, and also we can show a notification after clicking the favorite button attached to the recipe.

  Technologies: React, Express.js, Firebase, Vercel. these are the main technologies in this website
